SUMMARY

Software Engineer with **4+ years of experience** designing and building **reliable**, **scalable systems** across **FinTech**, **Mobility**, **Real Estate**, **E-Invoicing**, and **Enterprise Software**.
Worked on **large-scale SaaS platforms**, **Retail Management Systems (RMS)**, and **high-traffic applications**, including a national competition platform that successfully handled **400,000+ registrations in one week**.
Experienced in **backend and frontend development**, **API development**, **database design**, **distributed systems**, **performance optimization**, and **system design**, with a proven ability to transform **complex business requirements** into **maintainable**, **high-performance software solutions**.

PROFESSIONAL EXPERIENCE

Cyrus Technology , *Software Engineer* 03/2024 – Present | Cairo, Egypt

Contributed to building **enterprise B2B solutions** across **FinTech**, **Retail Management**, **E-Invoicing**, and **Multi-Tenant SaaS** platforms.

- **Offline-First RMS:** Led the development of an **offline-first Retail Management System**, implementing **data synchronization**, **state management**, **logging**, and **backup** mechanisms.
- **Fawry Payment Integration:** Integrated the **Fawry POS Payment SDK**, delivering **secure payment workflows**, handling **transaction edge cases**, and passing **production certification on the first submission**.
- **Legacy WinForms Modernization:** Led the **refactoring and migration** of a legacy **WinForms E-Invoicing** application to a modern **WPF MVVM** architecture, improving **maintainability**, **scalability**, **performance**, and **user experience**, while establishing a foundation for future feature development.
- **ETA Multi-Tenant Migration:** Contributed to migrating the **Egyptian Tax Authority (ETA)** e-invoicing platform to a **multi-tenant SaaS** architecture, focusing on **UX improvements** and enhancing the overall user experience.

United Media Services (via Clicks Egypt Outsource) 02/2022 – 01/2024 | Cairo, Egypt
Back End Developer

Built **mission-critical backend systems** for **United Media Services (UMS)**, delivering **government initiatives**, **national competitions**, **event management platforms**, **charity organizations**, and **e-learning systems** serving hundreds of thousands of users.

- **Dawlet El Telawa:** Built the backend for a **high-traffic national competition**, handling **400,000+ registrations within one week** while implementing **fraud prevention**, **secure voting**, and **rate limiting**.
- **Alamein Festival:** Developed backend services for a **large-scale national event management platform**, supporting operations across **two consecutive festival seasons**.
- **Resala Platform:** Contributed to **large-scale charity systems** with **FinTech integrations**, supporting donation and operational workflows.

- **Media & Learning Platforms:** Delivered backend services for **UMA E-Learning**, **UMS Podcast**, and additional media platforms with a focus on **performance**, **availability**, and **maintainability**.

SELECTED PROJECTS

Selected backend products spanning **Government**, **Enterprise SaaS**, **FinTech**, **Retail Management**, **Mobility**, **Media**, **Travel**, **E-Learning**, and **Real Estate**.

- **Alamein Festival** — National event management platform.
- **Dawlet El Telawa** — High-traffic competition & voting platform.
- **Resala** — Charity management platform.
- **UMA** — E-learning platform.

- **Sphinx Travel** — Travel booking platform.
- **WatchIT Script Portal** — Script evaluation platform.
- **UMS Podcast** — Media platform.

DealSpace CRM
Multi-tenant CRM SaaS for the **US real estate market**.

- **Architecture:** Designed a modular monolith using **Laravel Octane**, **Redis**, **Reverb**, and **FrankenPHP**.
- **Scalability:** Implemented secure multi-tenancy, optimized data access, and real-time communication.
- **Integrations:** Google Maps, Google Calendar, and automated email workflows.

Fentec Mobility
Backend platform powering an e-scooter mobility ecosystem.

- **Business Solution:** Designed an offline cash-to-digital wallet ecosystem for a cash-driven market.
- **High Concurrency:** Processed continuous IoT communication using **Laravel Octane** and **Redis**.
- **Platform Services:** Implemented geofencing, KYC, fleet management, and real-time wallet tracking.

SKILLS

Backend: Java, Spring Boot, Laravel, REST APIs, Modular Monolith, Multi-Tenant SaaS, Authentication & Authorization, Queues, Background Jobs, WebSockets.
Frontend & Mobile: React, React Native, JavaScript, HTML, CSS, Responsive Design, Mobile Application Development.
Architecture & Performance: System Design, High-Concurrency Systems, Distributed Systems, Offline-First Systems, API Optimization, Caching, Asynchronous Processing.
Databases & Infrastructure: MySQL, SQL Server, Redis, Docker, Linux, Nginx.
Integrations: Fawry POS SDK, Google Maps API, Google Calendar API, Third-Party API Integration.

EDUCATION

Higher Institute of Languages Sheraton | Cairo 09/2021 – 06/2025 | Cairo (sheraton), Egypt
